ビニール傘の便利さの裏にあるものについて考えてみましょう。

☼ Today many plastic umbrellas are sold in Japan. They are very popular because they are convenient and cheap. We can buy them at nearby shops such as convenience stores, station kiosks, and 100-yen shops. If we get caught in the rain without an umbrella, we can easily buy a plastic one. Some people keep several plastic umbrellas at their school, office, or home. You might be one of ① them.

Plastic umbrellas are useful, but they are causing serious environmental problems. Have you ever thought about how they affect the environment?

☼ Plastic umbrellas produce a large amount of (②). There are several reasons for this. First, plastic umbrellas are often regarded as ③ “disposable,” and are thrown away soon after use. Many of them are left on trains and buses, or in taxis. Second, they cannot be repaired or recycled. They are not very strong, and break easily especially in heavy rain. When they are torn or broken, ④ it is very difficult to take them apart and separate them into different parts. This is because each part is glued* firmly together with an adhesive*. They cannot be burned in incinerators*, so they are dumped* in landfill sites*.

☼ What can we do to reduce waste from plastic umbrellas? Do you have any ideas? One way is (⑤). If there is a chance of rain, we can carry a folding umbrella in our bags. We should be aware of the problems that plastic umbrellas cause. Let's think carefully before buying another plastic umbrella.
